* Running function: Set in the switch in forward state, the vehicle will move forward when you stepping on "foot pedal". Set it in backward state, the vehicle will move backward. Set the switch in the middle state, the vehicle can not move. (If the car has remote control function, you can also control the car with the remote control.)

Charging Warning!

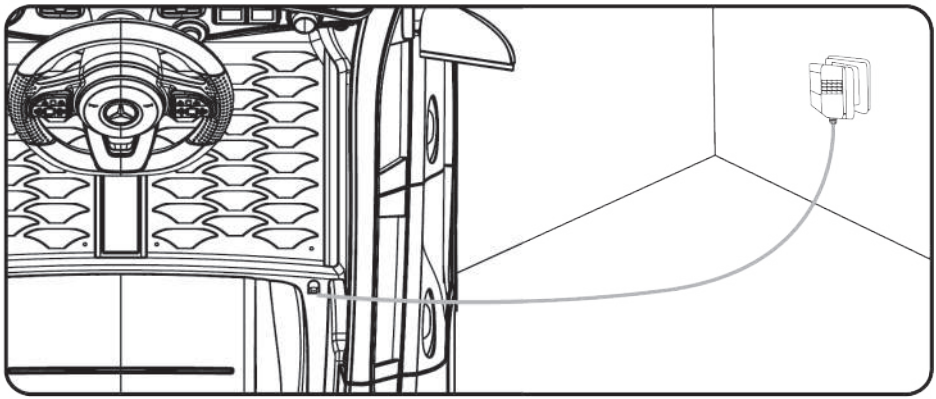
⚠ Warning!

To avoid fires and electric shock:
---Only allowed to use the battery and charger prescribed by the manufacturer. Prohibite to use the
other brand.
---Do not put the battery and charge in other products.
---It is not allowed to change the line structure privately.
---Do not link positive terminal and negative terminal by any conductor.
---Please keep the battery dry,far away from any liquid.
---When charging, do not smoking nearby,any flames may cause explosion.
---Please charge the vehicle in well ventilated, dry area.

Charging precautions
* Battery can not be reversed.
* Battery type: closed dry battery.
* Please check the charger, battery and plug before charging. If any damage found, stop using unless repair intact.
* It's normal for battery heating in charging process. If the temperature in too high, please check either the current flow is too strong or battery internal short-circuit.
* To avoid likely damage caused by battery to child, must fix the battery with platen.
* If the vehicle unused for long time, it must be fully charged, and charge once each month to ensure the battery life.
*Batteries are only to be charged by adults or children at least 8 years old.
*The batteries of the remote control are non-rechargeable, do not charge them.
* Batteries should be installed with the correct polarity. Do not mixed different types of batteries or new and used batteries.Exhausted batteries must be removed from the vehicles.

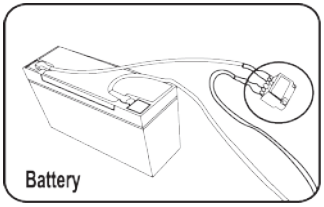
When charging, turn off the power switch.
After first use, recommend to charge 16 hours but not more than 20 hours.
When the vehicle speed slows down obviously, indicating the battery is low, please charge.
After use, please charge 8 to 12 hours, not exceeding 20 hours.

Charging exhibition



Troubleshooting

■ Problem: the vehicle can not move
Answer 1: it is low battery
Please charge in time after each use, charge at least once each month. Recommend to charge 4 to 6 hours but not more than 10 hours.
Answer 2: overloading
An automatic reset fuse is equipped in the battery box. When overloading, it will cut off the power for 15 to 20 seconds, then restart.



To avoid fuse cut off the power:
1.Max:30kgs, overload is forbidden.
2.Do not drag any items behind this products.
3.Do not allow water or other liquids dip the electrical parts.
4.Do not change the line system by yourself.

Answer3: battery is broken
Please contact the agent or manufacturer.
Answer4:car body wiring has been damaged
Please contact the agent or manufacturer.
Answer5:the motor is damaged
Please contact the agent or manufacturer.

■ Problem: unable to charge

Answer1: the battery plug-ins loose

Make sure the battery terminals have connected with the wires tightly.

Answer2: the charger is not inserted in place

Make sure the charger is plugged into the power outlet properly(ensure the power outlet switch turn on)

Answer3: the charger can not work normally

If the charger doesnot work, please contact the agent or manufacturer.

■ Problem: vehicle run for a short time

Answer 1: the battery is not fully charged

The charging time is not enough, please charge in time after each use.

Recommend to charge 8 to 12 hours but not exceeding 20 hours.

Answer2: battery using age

Battery service life:1-3 years, otherwise, change a new one.

■ Problem: charger makes a buzzing sound while charging

This is normal.

■ Problem: charger heating phenomenon

This is normal. If the battery temperature is too high, please check either the current flow is too strong or battery internal short-circuit.

Note on Safety

1. This vehicle is not suitable for children under 36 months. Please use this vehicle under the supervision of adults.
2. Please keep this vehicle far from pool, highway, slopes or other dangerous places.
3. To avoid gearbox and motor damage, ensure the vehicle has completely stopped when shift gears.
4. Before using, adults should check the main parts:battery, charger, wires, plugs, security risks. Any damage found, stop using until well repaired.
5. To avoid rust lubricate the iron parts with lubricating oil after using for some time.
6. The vehicle should be kept away from fire and long-term light side-up for shortage, upside down.
7. Do not use the fuse not matching the product.
8. Do not change the wire system by yourself, the repair work must be carried out under the guidance of professionals and technical staff.

Remote control priority function
Please refer to the use of the remote control description.
The remote control must be used under the adults' supervision.

Suitable age: For children between 36 months to 95 months old only.
(please use this vehicle under the supervision of adults.)

⚠ Warning!

For Safety sake:
*Please use this vehicle under the adults guidance and supervision.
*Prohibited to use this product on the road, slopes, highway or other dangerous places.
*When driving, children must wear shoes and helmet.
*When driving, children should be seating in the seat and fasten the seat belt.
*The maximum loading capacity of this vehicle is 30kgs,and can take only one child. The users must be aged 36 months to 95 months.
