3. CAUTIONS FOR SAFETY

1. While riding, adult supervision is required at all times.
Always wear a helmet when riding.
2. Do not drive near roads or on busy walkways and sidewalks.
3. It is not recommended to drive the vehicle on wet surfaces or on slopes of greater than 15 degrees.
4. It is not recommended to ride this vehicle on sandy or soft surfaces.
5. Do not use this vehicle outdoors when it is raining .
6. Make sure you come to a complete stop before changing directions from forward to back.
7. Don't allow children to operate the charger or play with the battery.
8. Clean the motorcycle with a dry cloth only.
9. Please follow the correct weight and age limits allowed to drive this vehicle.
10. It is prohibited to change the circuit or add other electric parts.
11. Adults must teach their children about safe driving procedures.

12. Please turn off when not riding.
13. Check the seat to confirm it has been fitted and secured before driving.
14. Inspect wires and connections of the vehicle periodically
15. Don't mix new and old batteries.
16. Charging the battery should only be done by adults.
Charging plug is located underneath the seat.
17. In order to avoid accidents ,please ensure the vehicle is safe before riding.
18. Check all wire plugs and connections periodically.

Warning:

Not to be used in traffic.

Warning:

This toy is unsuitable for children under 3 years due to its maximum speed.

The toy should be used with caution since skill is required to avoid falls or collisions causing injury to the user or third parties.

Assemble real driving wheel

Assembly Steps

Assemble of steering wheel

Vehicle Function

WARNING

To reduce the risk of injury, adult supervision is required. Never use in roadways, near motor vehicles, on or near steep inclines or steps, swimming pools or other bodies of water, always wear shoes, and never allow more than 1 rider.

Charging The Vehicle

Charge socket is at the right

Caution: You must charge the 6 Volt battery for a "Full" 10 hours prior to use. Never charge the battery longer than 20 hours.

Failure to charge the battery as directed will cause permanent damage to the battery. After each use, or once a month minimum, recharge the battery of your vehicle for 8-10 hours. Do not charge the battery longer than 20 hours.

Never run battery completely dead.

Find the socket As shown ①

Plug the charger port into the input socket.

Plug the charger plug into a wall outlet. As shown ②

Fuse

When the vehicle won't work or cannot be charged, please check the fuse. Replace the fuse if necessary, and wait 10 seconds for the fuse reset and power on. The car features one thermal reset fuse in under the seat. (Refer to the picture.)

They will automatically trip and cut all power to vehicle if the motor, electric system or battery is overload. The fuse will reset and power on, after approximately 10 seconds.

Trouble Shooting Guide

Problem	Possible Cause
(1).The 6 Volt battery will not recharge	1.Motor connector or adapter connector is loose. Make sure the motor connector and the adapter connector is firmly plugged. 2.The 6 volt battery will not recharge. Make sure the charger is plugged into a 110v wall outlet and the power flow to the outlet is on. 3.Charger is not plugged in. Make sure the charger is plugged into a 110v wall outlet and the power flow to the outlet is on. 4.Check and replace fuse if necessary
(2).The vehicle does not run	1.The battery may be low on power. After each use, or once a month minimum, charge the battery for a "full" 10 hours. DO NOT leave the battery on the charger for more than 20 hours. 2.Thermal fuse has tripped. Replace the tripped fuse by another spare one. 3.Tighten the wheel nuts with wrench. 4.Motor connector or wires are loose. Make sure the motor connector is firmly plugged into the battery. 5.Battery is dead. Have you properly maintained the battery according to the directions?Is the battery old? Your battery may need to be replaced. 6.Water may have corroded the system,or loose dirt,gravel of sand(not sand) might have jammed the switch please check. 7.Motor is damaged. The vehicle needs professional repair.
(3).The vehicle does not run very long.	1.Battery may be undercharged. You may not be charging the battery long enough. After each use, or once a month minimum, charge the battery for a "full" 10 hours. DO NOT leave the battery on the charger for more than 20 hours. 2.Battery is old. The 6 volt battery will eventually lose the ability to hold a charge. Depending on the amount of use, and varying conditions, the battery Should operate for one to three years. Replace the battery with a new 6 volt battery.
(4).Battery buzzes or gurgles when charging.	1.This is normal and not a cause for concern. It may also be silent When charging, which is also normal.
(5).Charger feels warm when recharging battery.	1.This is normal and not a cause for concern.

(6).The vehicle runs sluggishly or beeping occurs.	1. Battery needs recharging. After each use, or once a month minimum, charge the battery for a "full" 10 hours. DO NOT leave the battery on the charger for more than 20 hours. Low battery signal will sound when the battery is running low on power. 2. Battery is old. The 6 volt battery will eventually lose the ability to hold a charge. Depending on the amount of use, and varying conditions, the battery Should operate for one to three years. Replace the battery with a new 6 volt battery. 3. Vehicle is overloaded. Maximum weight is 25 kgs. DO NOT overload the vehicle. DO NOT tow anything behind the vehicle. ONLY one rider at a time.
--	---

Maintaining Your Vehicle

- Occasionally use a lightweight oil to lubricate moving parts such as wheels and the steering linkages.
- Park the vehicle indoors or cover it with a tarp to protect it from wet weather.
- Keep the vehicle away from sources of heat, such as stoves and heaters. Plastic parts may melt.
- **ADULTS ONLY:** Recharge the battery after each use. Recharge the battery at least once a month when the vehicle is not being used. See page 7 for instructions about recharging the battery.
- **DO NOT** wash the vehicle with a hose. **DO NOT** wash the vehicle with soap and water.
- **DO NOT** drive the vehicle in rainy or snowy weather. Water will damage the motor, electric system and battery.
- Clean the vehicle with a soft, dry cloth. To restore shine to plastic parts, use a non-wax furniture polish. **DO NOT** use car wax. **DO NOT** use abrasive cleaners.
- **DO NOT** drive the vehicle in loose dirt, sand or fine gravel, which could damage moving parts, motors or the electric system.

Disposal Of Battery

Disposal of Battery

- Your sealed lead-acid battery must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of your lead-acid battery in a fire. The battery may explode or leak.
- Do not dispose of a lead-acid battery in your regular, household trash. The incineration, land filling or mixing of sealed lead-acid batteries with household trash is prohibited by law.
- Return an exhausted battery to your local approved lead-acid battery recycle, such as a local seller of automotive batteries.
- Contact your local waste management officials for other information regarding the environmentally sound recycling and disposal of lead-acid batteries.
