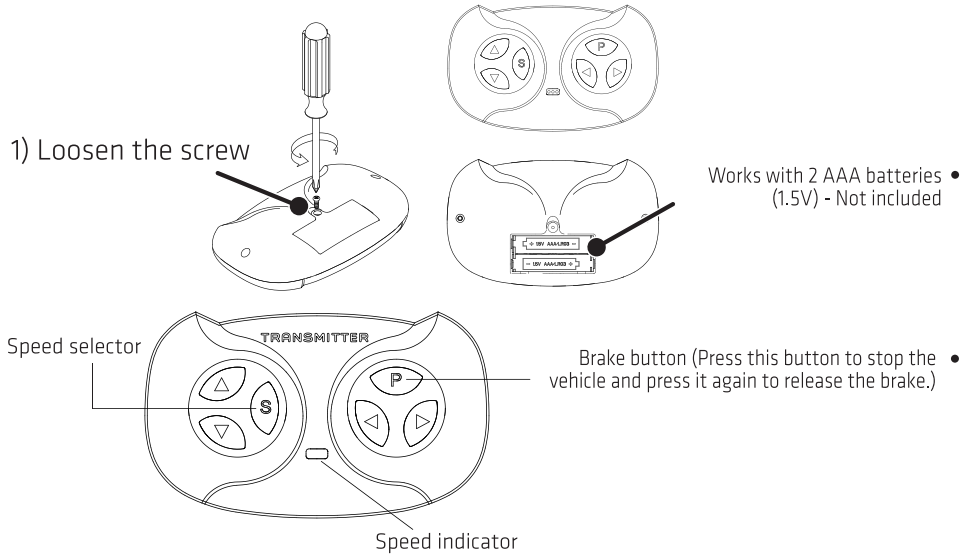
14 Radio control



RADIO CONTROL CONTROLS.

To activate the remote control of the item, you need to synchronize the remote control with the item using a frequency signal. Once the devices are linked, no other external device (toy) can be controlled with the same controller.
Button function: the "S" button is the car speed selector.
(It has 3 speeds: low, medium and high that will be shown on the red LED indicator on the remote)
This switch makes the vehicle go in fast, normal or slow gear.
When the vehicle moves backwards, it will only operate in slow gear.

Instructions for the 2.4G radio control remote control:

STEP 1: TURN OFF THE CAR POWER BUTTON.
STEP 2: HOLD THE ▲ & ▼ BUTTONS FOR 3 SECONDS TO START PAIRING WITH THE CONTROLLER.
STEP 3: TURN ON THE CAR AND THE RED LED INDICATOR ON THE REMOTE SHOULD STOP FLASHING.
(ONCE THIS HAPPENS THE LINK OF THE CONTROLLER WITH THE CAR WILL HAVE BEEN CORRECTLY ESTABLISHED.)

The remote control will take priority over operating the vehicle with the pedal. (The pedal will not work if you are using the remote control).
Warning! Not suitable for children under 36 months. Small pieces.
Changing from manual driving mode to radio control mode, and vice versa, must always be done by an adult.
Non-rechargeable batteries should not be charged.
Different types of batteries, whether new or used, should not be mixed.
Make sure batteries are placed in their correct polarity position.
Used batteries must be removed from the product.
Keep the packaging, it contains important information.
Changing batteries must be carried out by an adult.
Recharge batteries only under adult supervision.
Do not short circuit the power terminals.
Warning: Use of the remote control must be done by an adult.
Warning the remote control is not a toy. It is for adult use only, and should not be used by a child. Close adult supervision is always required. Reception range may change significantly with weather, battery and other environmental conditions.
Do not mix alkaline, standard (carbon-zinc), or rechargeable batteries.
Manufactured in accordance with FCC certification tests and with EMC credentials.
